Resins

## PLIOWAY RESINS: FOR ODORLESS STAINBLOCKING PRIMERS WITH SUPERIOR BLOCKING PROPERTIES

THE PLIOWAY® LOGO  
IS THE SIGNATURE OF PAINTS  
MEETING HIGH QUALITY AND  
PERFORMANCE TESTS.

**Plioway resins** were uniquely developed for solvent based odorless stainblocking primers. These solvent based resins will give all the blocking and penetration attributes of a solvent based primer, without all the odor. Plioway resins have a very fine particle size which when used in a coating enables the coating to penetrate deep.

**Odorless stain blocking primers** block difficult stains like water-soluble inks, water damage and nicotine stains without the need to evacuate the building during the application and drying process. These specialty primers also block and seal in odors from fire and smoke damage. The odorless primers can be applied by spray, brush or rollers.

**Let's share the future.** Eliokem is a global company with manufacturing, sales & marketing, research & development all across the world. New product and application developments are primary focuses of Eliokem. Our expertise and commitment to product innovation make Eliokem the best partner for all its customers.
